

Delete Devices Instruction

1. Go to Device menu, and tap on the  on top right corner, tap on the “X” on All

 lamps, and tap on “OK” . The screen would show “Please add a new

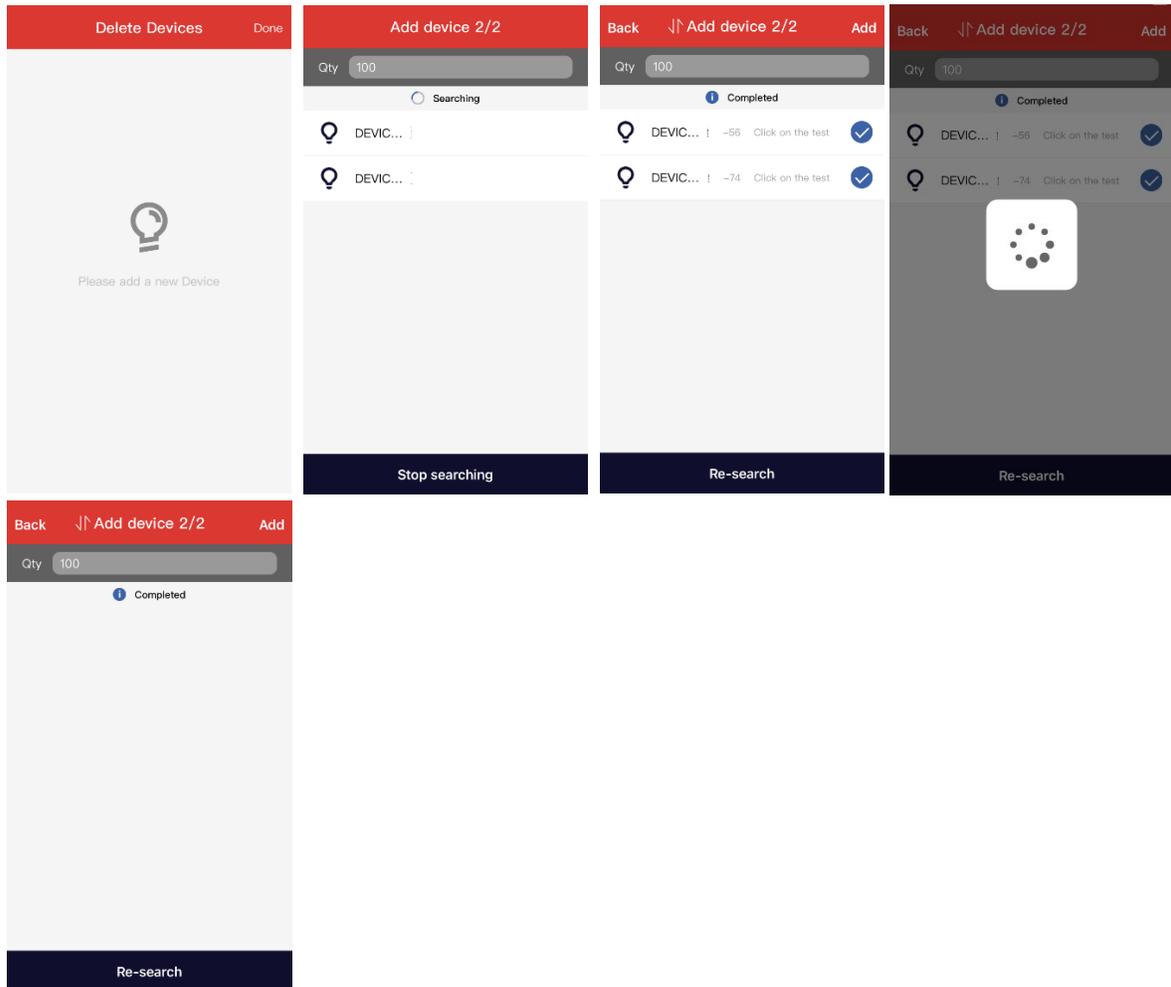

Device” as shown. 

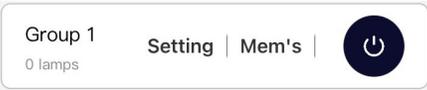

Adding Devices Instruction

1. Tap on the “Please add a new Device” , Change the QTY to 100 and wait until search is done. At the top center, it would show how many fixtures detected within the range **↕ Add device 2/2**. Tap on each device to be added and it would

show “check mark” . Tap on “Add” on top right, and wait until completed. Tap “Back” on top left corner, and it would go to Device screen

2.The device added would be shown on the “Device” screen. Tap the “Group” at the bottom

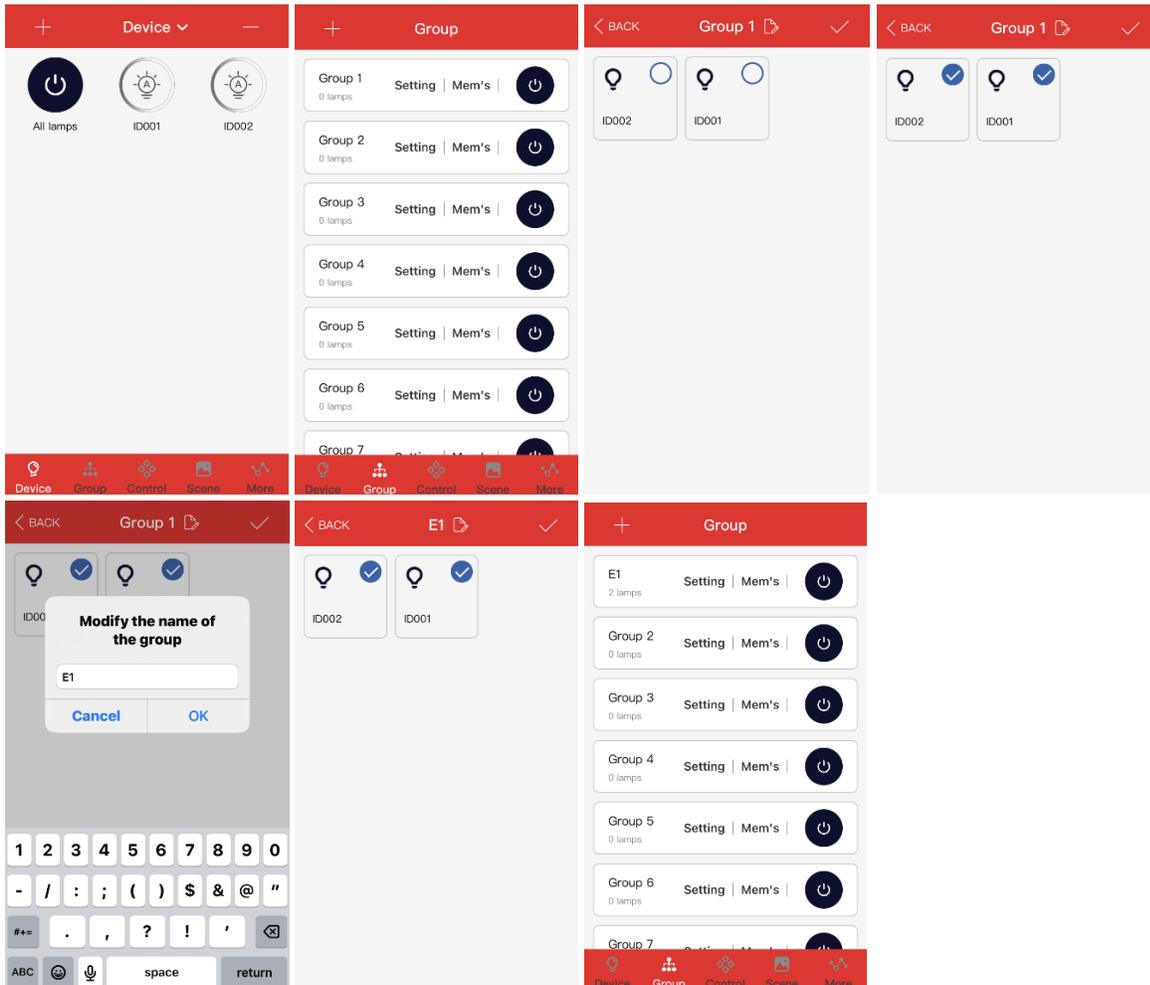

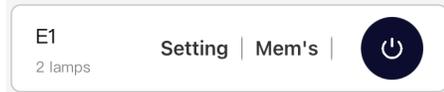

screen. Tap “Mem’s” on the Group 1  . Tap on the blue circle

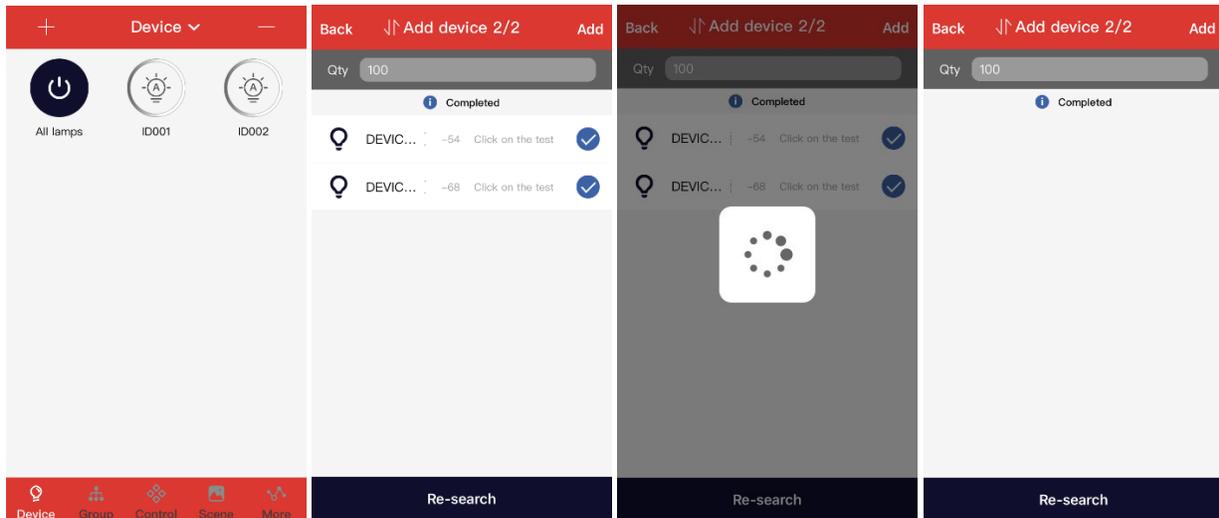

to add check mark on all devices. Tap on  to modify the Group name, then

tap “OK”  . Tap the “Check Mark”  on top right corner . Now the Group would

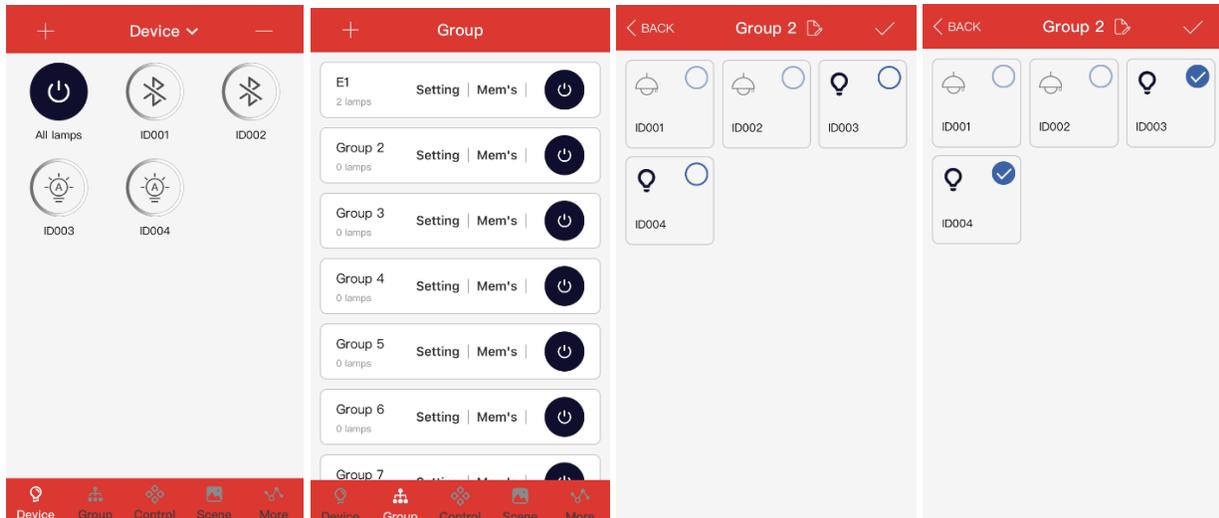

show E1 having 2 lamps.

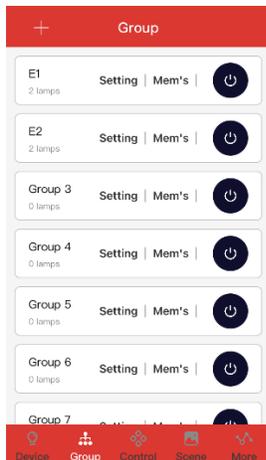

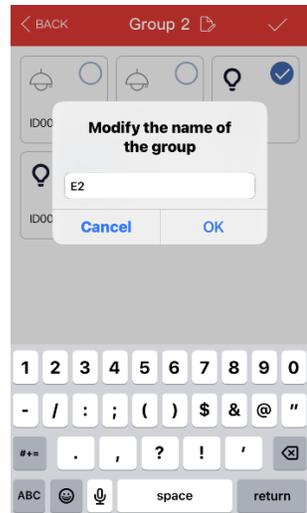

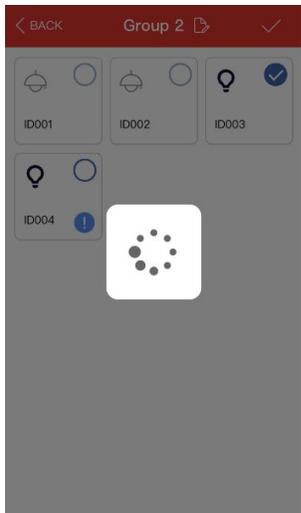

3. To add more group, Tap on the “+”. Add devices the same way as previous step.

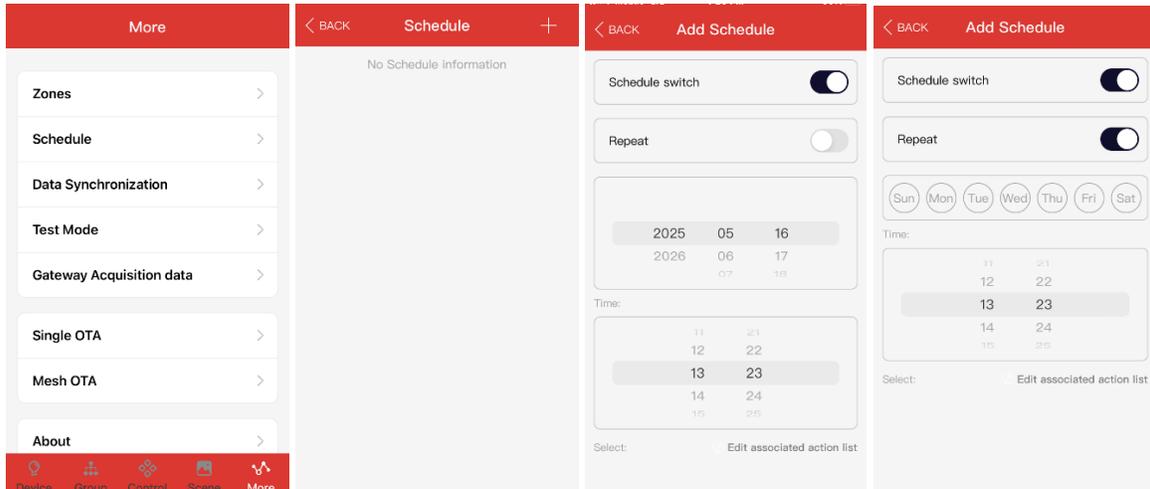

4. Tap on Group tab, and tap on “Mem’s” on Group 2. Identify the fixtures not linked, and tap on to add blue check marks, and tap on . In case some still missing blue check mark, re-tap and add again until all added. Group can be renamed to differentiate with the other groups.

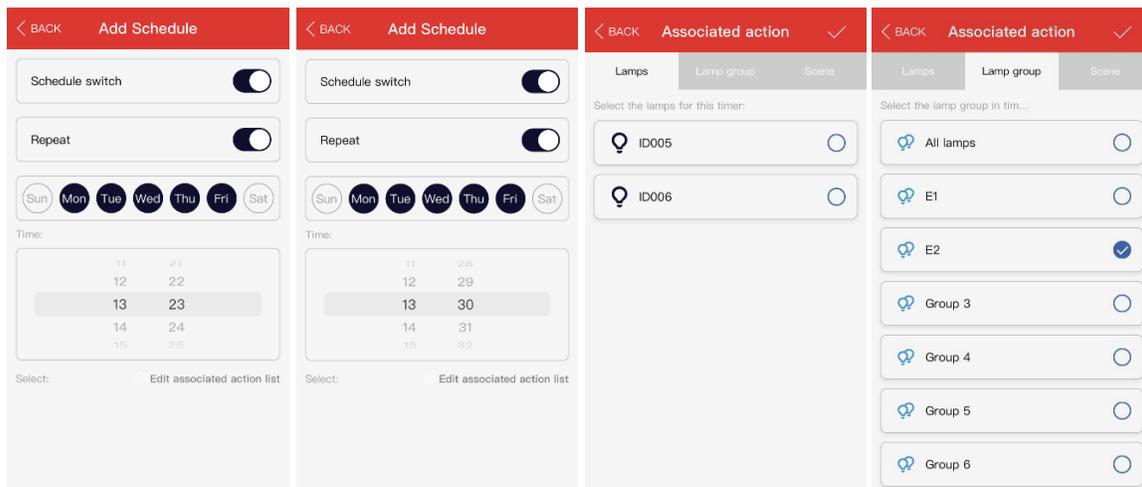

Scheduling Devices Instruction

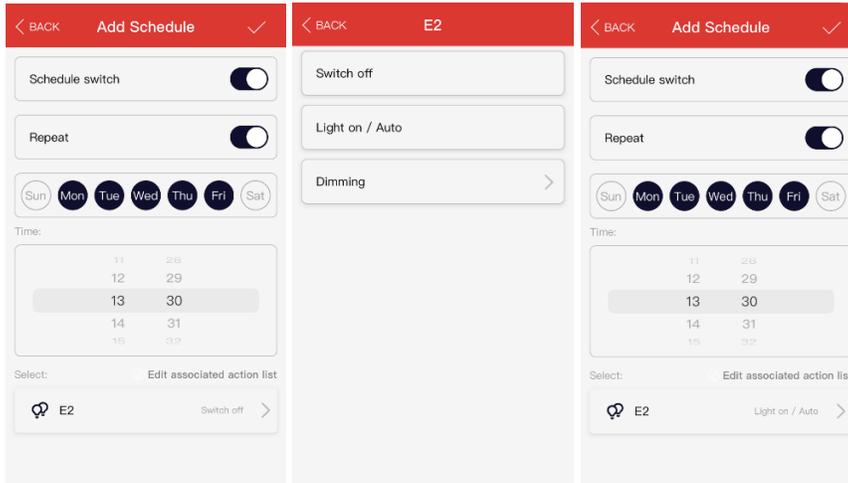

1. Tap on “Schedule”, and Tap on the “+” located on top right corner. The Date and time would be automatically set at current, and can be adjusted according to what’s needed. There’s a “Repeat” tab, which can be use to set the Days.

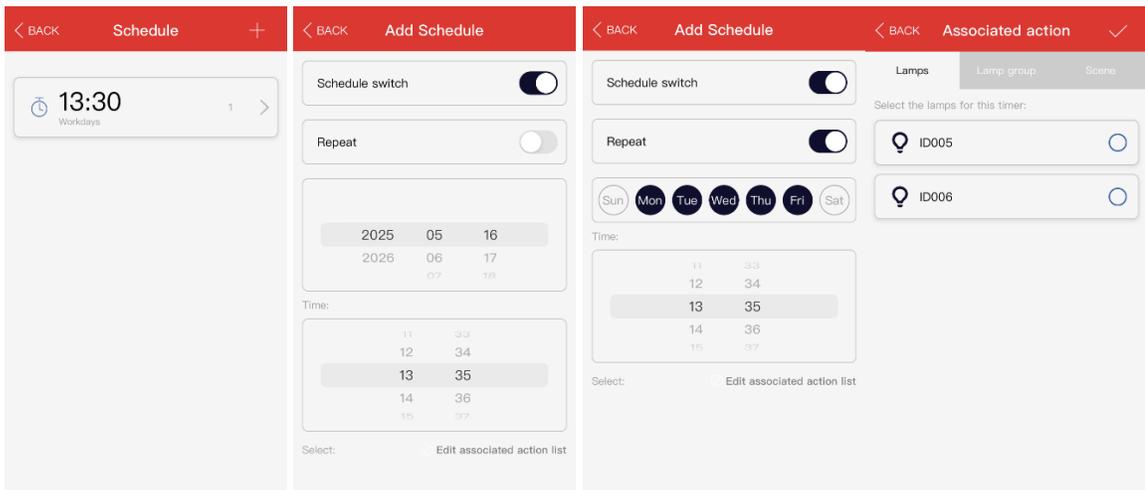

2. Tap on the Days desired, in this example would show all weekdays. Adjust the time desired, and tap on “Edit associated action list” icon. If group had been setup previously, tap on the “Lamp group” tab. Pick the group associated with, and tap on the check mark on top right corner.

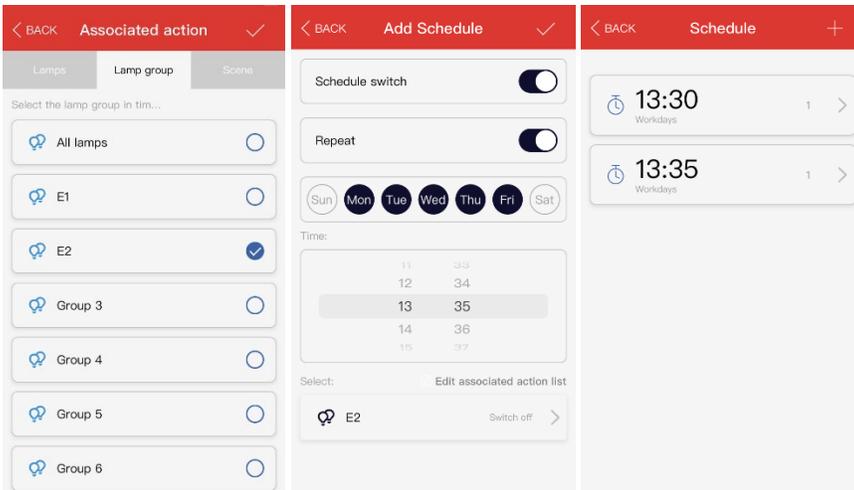

- The screen would go back to “Add Schedule” Tab, and this time there’s a group “E2” set at “switch off”. Tap on the “>” arrow next to the “switch off”, and it will show more options whether to “Switch off, Light on / Auto, or Dimming”. Below example showing that the lights would want to be turn on at 13:30, and tap on the “check mark”.

- The “Schedule” tab would show the lights to be turn on every workdays at 13:30. To add more schedule, just tap the “+” on the top right corner. Same steps are taken to have the light to switch off at 13:35 workdays. To add more schedules just proceed to add more desired schedules.

5. To delete unwanted schedule, just tap on the “>” button, and hold for few seconds, the  icon would appear. There can be up to 8 schedules to be setup.
